New Journal: Asia-Pacific Science Education (APSE)

Asia-Pacific Science Education (APSE) publishes original articles providing on-going educational problems associated with science learning and teaching in the Asia-Pacific region. APSE seeks to provide researchers in the Asia-Pacific region with a central channel for disseminating research about issues in science education in Asia to both the regional and international research community.

APSE's scope is broad in both methodology and content and we accept research conducted at all levels, including early childhood, primary, secondary, tertiary, workplace, and informal learning as they relate to science education. The Editorial Board invites scholarly manuscripts employing various methodological approaches, including qualitative research designs (e.g. ethnography, narratives, case studies, historical/philosophical approaches, etc.) as well as quantitative research designs (e.g. quasi-experimental design, correlation study, hierarchical linear model, etc.). APSE also publishes theoretical papers, position papers, and critical reviews of literature on emerging issues in the field of science education.

APSE will operate as an Open Access (OA) online journal using a continuous publication model where articles are made available immediately. The Journal will be published in English and an abstract written in the author's native language will be also featured with the article. Springer publishes APSE in collaboration with KASE (Korean Association for Science Education).

Call for papers

The debut issue of APSE is anticipated to appear in summer 2014. The Editorial Board invites researchers to submit original article-length manuscripts (not exceeding 10,000 words including references and single-spaced). Detailed expectations for manuscript preparation and submission will be accessible via the Instructions for Authors section of our soon to be launched website.

How to submit Manuscripts

Detailed information about manuscript submission requirements is currently available via E-mail. The deadline for papers to be submitted for consideration in the debut issue is **May 30, 2014**.
